PROFILE

Enthusiast in systems administration and technical support, with practical experience in configuring virtual servers, Python automation, and managing services in Windows and Linux environments. Passionate about designing reproducible, secure, and scalable solutions. Seeking opportunities to apply my methodical approach and continue growing in technical roles.

WORK EXPERIENCE

Feb 2026 – Oct 2026

Cybersecurity Trainee & SysAdmin Jr., Neoseq

- Designed and configured isolated virtual labs to deploy and evaluate ITSM, encryption and IAM solutions for clients.
- Configured GPOs and Windows Server services to deploy GLPI agents and enforce security controls, enabling centralized asset and incident management.
- Supported IAM operations (L1–L2), managing user lifecycle and secure credential recovery, helping contain at least monthly brute-force attempts via lockout and IP ban policies.
- Assisted in Active Directory governance and hybrid operations, supporting DC promotions/demotions and validating directory synchronization with AWS.

Jul 2025 – Sep 2025

IT Support Technician, World Lighting Technology Group · Toluca

- Developed 2 Python applications for data analysis and operations, including a tool that automated invoice–complement matching, reducing a manual process to a few minutes.
- Collaborated in technical support and script debugging, contributing to team incident resolution.
- Provided on-site and remote technical support to users, installing and configuring software to optimize IT environments.
- Trained users on IT applications, improving tool adoption and reducing support queries by 20%.

Aug 2018 – Present

Freelance Project: Independent Technical Support

- Provided remote and in-person user support, applying open-source software and physical tools to minimize downtime.
- Managed Windows and Linux environments, focusing on quick and secure solutions.
- Diagnosed and resolved over 50 technical incidents using data recovery tools and Linux (Debian), in hardware and software.

Apr 2018 – Oct 2018

High School Social Service: Technical Support, IMIFE · Toluca, Mexico

- Verified and optimized network connectivity in institutional equipment, ensuring 95% uptime.
- Performed preventive and corrective maintenance on over 20 computer devices.
- Advised users and managed support tickets, improving operational efficiency.

EDUCATION

Jun 2023 – Present

Computer Science Engineering, CNCI Universidad Virtual · Toluca

- Cybersecurity Certification
- Python Certification
- JavaScript Certification
- Expected graduation: June 2027

Sep 2018 – May 2022

Computer Engineering, Universidad Politécnica del Valle de Toluca · Toluca

• TOEFL

SKILLS

Cybersecurity & Identity Management (IAM)	Active Directory Domain Services (AD DS) and Tier Structure Design • Administration and Debugging of Group Policy Objects (GPOs) • User Lifecycle Management, Access Control, and Password Policies • Corporate Encryption and Data Protection (Prim'X, Virtru, Overe) • Information Security Standards and Regulations (ISO/IEC 27001)
Systems & Cloud Administration	Operating Systems: Windows Server (2012/2016/2019) and Linux (Debian Environments, Bash Scripting) • Cloud Computing: Microsoft Azure (AZ-900) and Directory Synchronization Validation on AWS • Web Services: Basic IIS Configuration
Infrastructure & Virtualization	Test Environments (PoC): Creating Isolated Labs and Internal Networks with VirtualBox • Networks: Site and Subnet Topology Management • ITSM: Implementation and Deployment of GLPI for Asset and Incident Management
Automation & Development (DevSecOps)	Scripting: Python Focused on Task Automation and Local Search Tool Development • Version Control: Git/GitHub for Versioning Configurations • Databases: MySQL and PostgreSQL (Administration and Deployment for IT Services)
Personal/Soft Skills	Leadership • Teamwork • Creativity • Critical Thinking • Empathy • Conflict Resolution • Adaptability • Stress Management • Effective Communication • Self-Taught • Problem Solving

COURSES

Nov 2026 – Present	**CCST Cybersecurity, Cisco at certiport.com**
Jun 2026 – Present	**Ethical Hacker, Cisco at netacad.com**
Mar 2026 – Present	**ISO/IEC 27001 Information Security Associate, SkillFront**
Jun 2025 – Present	**Git Foundations, CodigoFacilito at PSI Platform**
Feb 2025 – Present	**IT Specialist - JavaScript, Pearson**
Feb 2025 – Present	**IT Specialist - Cibersecurity, Pearson**
Feb 2025 – Present	**IT Specialist - Python, Pearson**
Jan 2022 – Present	**Microsoft Certified: Azure Fundamentals, Microsoft at learn.microsoft.com**

LANGUAGES

Spanish	Native speaker	English	Intermediate

PERSONAL PROJECTS

Sep 2025 – Present

Graphical Application for PATH Repair (Python)

- Developed a Python GUI to detect and correct PATH environment variables in Windows and Linux, resolving recurrent issues in multi-OS setups.
- Applied best coding practices; ready for GitHub as an open-source tool.

Aug 2025 – Present

Virtual Servers Configuration

- Implemented two independent servers in VMs: Alma Linux for network testing and Ubuntu Server for web services, practicing virtualization and security hardening.
- Experimented with deployment and monitoring, applying cybersecurity concepts.

Jun 2025 – Present

Scalable Project: CRUD Users

- Integrated PostgreSQL for efficient queries in a user management app.
- Used Python with best practices in VS Code and PyCharm for scalability.

Feb 2025 – Present

Personal Web Page (CódigoFacilito Course)

- Built a portfolio with HTML, CSS/Sass, and JavaScript, focused on responsive design.
