Eduardo Cruz García

Computer Science Engineering

■ DevCruGa@protonmail.com ■ +52 7299822287 ■ Toluca, México ■ https://eduardocg-0093.github.io/Resume/

Education

Computer Science Engineering,
CNCI Universidad Virtual

06/2023 – Present | Toluca

- Cybersecurity Certification
- Python Certification
- JavaScript Certification

Computer Engineering, *Universidad Politécnica del Valle de Toluca 09/2018 – 05/2022 | Toluca*

- TOEFL

Technical Skills

Cybersecurity & Identity Management (IAM)

- Active Directory Domain Services (AD DS) and Tier Structure design.
- Administration and debugging of Group Policy Objects (GPOs).
- User lifecycle management, access control, and password policies.
- Corporate encryption and data protection (Prim'X, Virtru, Overe).
- Information Security Standards and Regulations (ISO/IEC 27001).

Systems & Cloud Administration

- Operating Systems: Windows Server (2012/2016/2019) and Linux (Debian environments, Bash scripting).
- Cloud Computing: Microsoft Azure (AZ-900) and directory synchronization validation on AWS.
- Web Services: Basic IIS Configuration.

Infrastructure & Virtualization

- Test Environments (PoC): Creating isolated labs and internal networks with VirtualBox.
- Networks: Site and Subnet topology management.
- ITSM: Implementation and deployment of GLPI for asset and incident management.

Automation & Development (DevSecOps)

- Scripting: Python focused on task automation and local search tool development
- Version Control: Git/GitHub for versioning configurations
- Databases: MySQL and PostgreSQL (administration and deployment for IT services).

Professional Profile

Enthusiast in systems administration and technical support, with practical experience in configuring virtual servers, Python automation, and managing services in Windows and Linux environments. Passionate about designing reproducible, secure, and scalable solutions. Seeking opportunities to apply my methodical approach and continue growing in technical roles.

Professional Experience

Cybersecurity Trainee & SysAdmin Jr.
Neoseq | Febrero 2026 – Octubre 2026

- Solution Evaluation and Proof of Concept (PoC): Design and configuration of isolated virtual labs for the deployment and evaluation of cybersecurity and IT management tools, highlighting:
  - Service Management Systems (ITSM): Deployment and documentation of GLPI on Windows Server (configuring IIS and MySQL), automating the installation of agents on client computers using GPO policies.
  - Corporate Encryption and Data Protection: Implementation in domain joined environments of encryption software such as Prim'X (including modules such as ZoneCentral and Orizon) for folder encryption and access control lists, in addition to the evaluation of platforms such as Virtru and Overe.
- Identity and Access Management (IAM): User lifecycle management and Level 1 and 2 ticket resolution, including secure credential recovery and containment of compromised accounts following brute-force attacks.
- Active Directory Governance (Tier Model): Technical participation in the restructuring and debugging of Group Policy Objects (GPOs), adapting active policies to a tiered administration architecture (Tier Model) to segment and secure privileges.
- Hybrid Infrastructure Operations (On-Premise & AWS): Assistance in promoting and demoting Domain Controllers (including migrations from legacy versions), maintaining Site and Subnet topology, and validating directory synchronization in AWS.

IT Support Technician
World Lighting Technology Group | Toluca 07/2025 – 09/2025

- Developed 2 Python applications for data analysis and operations, automating workflows and reducing manual times by 25%.
- Collaborated in technical support and script debugging, contributing to team incident resolution.
- Provided on-site and remote technical support to users, installing and configuring software to optimize IT environments.
- Trained users on IT applications, improving tool adoption and reducing support queries by 20%.

Personal/Soft Skills

- ***Leadership***
- ***Teamwork***
- ***Creativity***
- ***Critical Thinking***
- ***Empathy***
- ***Conflict Resolution***
- ***Adaptability***
- ***Stress Management***
- ***Effective Communication***
- ***Self-Taught***
- ***Problem Solving***

Certifications

CCST Cybersecurity — (11/2026-Present) By Cisco at certiport.com

Ethical Hacker — (06/2026-Present) By Cisco at netacad.com

ISO/IEC 27001 Information Security Associate – (03/2026 – Present) By SkillFront

Git Foundations – (06/2025 – Present) By CodigoFacilito at PSI Platform

IT Specialist - JavaScript: (02/2025-Present) By Pearson

IT Specialist - Cibersecurity: (02/2025-Present) By Pearson

IT Specialist - Python: (02/2025- Present) By Pearson

Microsoft Certified: Azure Fundamentals — (01/2022- Present) By Microsoft at learn.microsoft.com

Languages

- Spanish (Native)
- English (Intermediate – TOEFL)

Freelance Project: Independent Technical Support
08/2018 – Present

- Diagnosed and resolved over 50 technical incidents using data recovery tools and Linux (Debian), in hardware and software.
- Provided remote and in-person user support, applying open-source software and physical tools to minimize downtime.
- Managed Windows and Linux environments, focusing on quick and secure solutions.

High School Social Service: Technical Support IMIFE, Toluca, Mexico 04/2018 – 10/2018

- Verified and optimized network connectivity in institutional equipment, ensuring 95% uptime.
- Performed preventive and corrective maintenance on over 20 computer devices.
- Advised users and managed support tickets, improving operational efficiency

Personal Projects

Graphical Application for PATH Repair (Python)
09/2025 – Present

- Developed a Python GUI to detect and correct PATH environment variables in Windows and Linux, resolving recurrent issues in multi-OS setups.
- Applied best coding practices; ready for GitHub as an open-source tool.

Virtual Servers Configuration
08/2025 – Present

- Implemented two independent servers in VMs: Alma Linux for network testing and Ubuntu Server for web services, practicing virtualization and security hardening.
- Experimented with deployment and monitoring, applying cybersecurity concepts.

Scalable Project: CRUD Users
06/2025 – Present

- Integrated PostgreSQL for efficient queries in a user management app.
- Used Python with best practices in VS Code and PyCharm for scalability.

Personal Web Page (CódigoFacilito Course)
02/2025 – Present

- Built a portfolio with HTML, CSS/Sass, and JavaScript, focused on responsive design.
